# Cedar Ridge Quarries

Cedar Ridge Quarries is a supplier of high quality natural stones from the Arkansas River Valley in Ozark, Arkansas. We are a 360-acre quarry that produces beautiful stone with exceptional quality.

Cedar Ridge Quarries has recently come under new ownership and management. The new owners and operators will draw from their vast industry experience to develop this quarry to its full potential. What this means for the customer is selection of more products, products of higher quality, efficiency of operation to shorten lead times, and a focus on excellent customer service. This new plan will help us build relationships with our customers, allowing for their success as well as ours.

Cedar Ridge Quarries is committed to the future of this industry. We have been quarrying stone for decades past and will continue to quarry from our 300-year supply. There are certain criteria that are crucial for success in this industry as with any other. Such things as customer relations, integrity, quality, and commitment are words often forgotten in this day and age. Our promise to you is that these things are the cornerstones of our company. These are the things that build and sustain a company through years and generations.

The pictures in this brochure are a sample of the products that we can produce. In addition to what you see here, we can fill custom orders for beams, pillars, countertops, and dimensional cuts. The exceptional strength of our stone allows us to break the boundaries that bind other natural stone quarries.

Cedar Ridge Quarries would appreciate the opportunity to prove to you that we can be the cornerstone to your success.
